# The specialist in sustainable acoustical solutions

## OUR SUSTAINABLE SOLUTIONS

### BoSpray

Acoustic sprayplaster

### BoCoustic

Smooth acoustal finish

### BoCeiling

Acoustical ceiling panels

### Bo3Design

Acoustic 3D ceiling and wall panels

Acoustics is an important part of a space. Sometimes this is being overlooked. Take for example offices, classrooms, restaurants and other larger areas where groups of people come together. When the acoustics, reverb time or echo isn't controlled the productivity and the feeling of comfort is affected negatively.

Our solutions are made out of 100% recycled products. This means our products have no negative influence on the environment.

	BoCeiling	BoCoustic	BoSpray	Bo3Design
Soundabsorption (NRC)*	0.95	0.85 - 0.95	0.65 - 0.95	0.80
Available colours	-	...	•	...
Structures	Smooth	Smooth	Medium/Rough	Different structures

\* As an example, glass has an NRC value of 0.02. This means that 98% of the sound is reflected. For example, if BoCeiling is applied with an NRC of 0.95, then only 5% of the sound is reflected.

## BoCoustic

Acoustic seamless panelsystem with different finish options

- Panel consists of 100% recycled plastic(PET)
- Top layer consist of recycled cellulose
- Often used in larger living area's and reception area's.
- Different colors available
