

Office-Well-Being

Office-Well-Being

Weekly overview

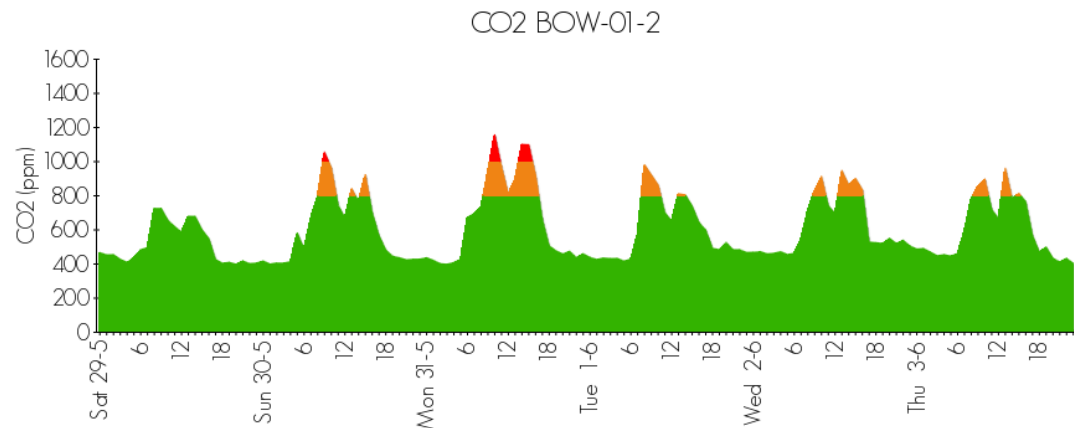

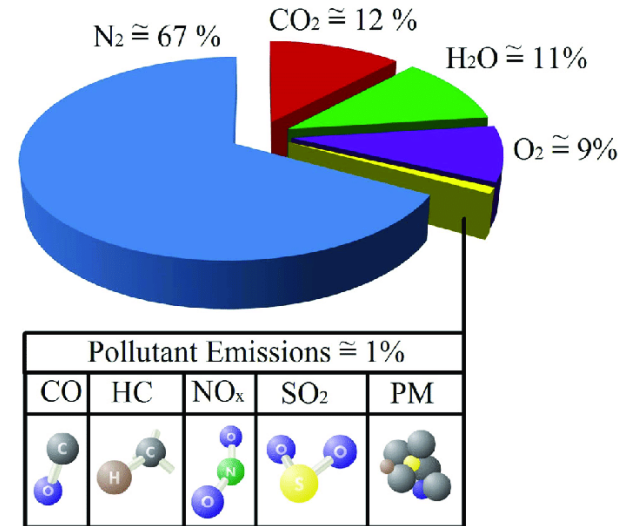

- CO2 had some peaks. (details in highlights)
- Some small peaks in temperature. Within margin
- Sound levels showed peaks. (details in highlights)
- General remarks(details in highlights)

Office-Well-Being

Highlights IAQ

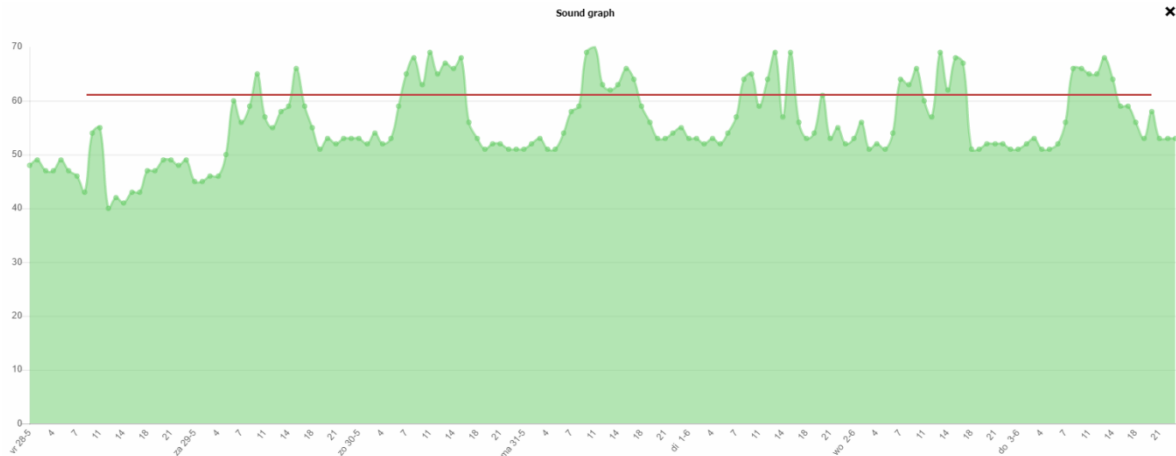

- CO2 level reached above 1000 ppm.
 - Reason is the trucks passing by and standing still with running engines in front of the office.
 - Diesel exhaust not only contains CO2, but also pollutant emissions which are unhealthy already at very low dosage

Office-Well-Being

Highlight indoor sound

- Sound peaks above 60 db are seen. Above 60 db will affect negatively the concentration and productivity.
- The survey shows that outside noise could play a role.

If you can't concentrate it's because ?
