Partners

# The product

## Acoustical spray plaster

# BoSpray

## Cellulose based acoustical spray plaster

1) Recycled cellulose 80% & waterbased emulsion

# Different surfaces:

## Which surface:

- Concrete
- (Gypsum) board
- Gypsum plaster
- Corrugated metal sheets

# Different surfaces:

## Concrete:

- A common used surface for exposed ceilings
- No pre-treatment needed

# Different surfaces:

## (Gypsum)board:

- Joints to be repaired
- BoPrimer to be applied
- BoSpray contains a lot of water which can cause the board to bend when not sealed

# Different surfaces:

## Gypsum plaster:

- BoSpray contains a lot of water which can cause certain repair spots to be soaked loss.
- BoPrimer to be applied over the gypsum repair spots

Gypsum

# Different surfaces:

## Pipes, ducting & utilities

- Commune with exposed ceilings
- No pre-treatment needed

# Different surfaces:

## Corrugated metal sheets

- These surfaces are mostly anodized so no special primer is needed
