**Product group:** BoWasher

## **Description**

The BoWasher spring washer is designed to mount the acoustical boards in an effective way through the gypsum board to the suspension grid.

## **Application:**

The spring washers are anchored using the appropriate screws of appropriate length. The spring washer screw is tightened until the washer reaches the absorbent board surface. Then cut a 5-7 mm deep cut along the entire washer and tighten the screw until the washer is no longer visible. Coverage: approx. 8 washers per 1 m<sup>2</sup>.

## **Technical features**

- Loop bent
- Stainless Steel 304
