Acoustics in restaurants

Principle

- 1) Sound waves need to be absorbed not reflected
- 2) Hard surfaces reflect and cause reverberation which creates discomfort

Sound Absorption

Hard surfaces reflect

Metal

Hard walls

Hard floor

**Hard
ceiling**

Furniture

BoSpray

High sound absorption

NRC(Noise Reduction Coefficient) = 0.65 – 0.95

15 mm: NRC 0.65
25 mm: NRC 0.75
37.5 mm: NRC 0.85
40 mm: NRC 0.95

Design & colour

Available in all RAL
colours
